# The Rockin' Roller

## **NEW 280" GRINDER / CNC GROOVER**

At Rol-Tec, we are always striving to find ways to meet our customers' ever changing demands. With our new CNC grinder/groover, we have yet another resource to satisfy our customers' needs. This gives us the ability to grind and groove larger rollers and to produce virtually any type of groove or groove pattern necessary to fulfill your needs and desires. So give us a call and get into the groover!

- **Max roll size 32" OD X 280" between centers**
- **Chevron Groove**
- **Rol-Tec Web-spreader**
- **Horizontal Grooves**
- **Timesaver type rollers for the woodworking industry**
- **For more on grooving see <http://www.rol-tec.com/capabilities.html>**

## **JIM McHUGH CELEBRATES 1 YEAR ANNIVERSARY**

Jim McHugh joined the Rol-Tec team as our primary salesman early in 2007. With over 20 years of printing and converting sales experience, Jim has been a welcomed addition to our staff. As you receive this and upcoming Rol-Tec newsletters, if any article catches your eye, feel free to call Jim at 1(800)497-4950 for more details. He is looking forward to your call and will do his very best to satisfy all your needs.

## **THREE CELEBRATE 10 YEARS WITH ROL-TEC**

Rol-Tec would like to congratulate (from L to R) **John Uhl** (grinding), **Jerry Irmick** (urethane), and **Mark Krueger** (rubber) for their ten years of service. These new inductees to the Decade Club give Rol-Tec 102 years of experience between the eight members in the club. We thank them for their continued dedication and loyalty to Rol-Tec and our customers.

## ROL-TEC DOUBLES MANUFACTURING SPACE

The 22,000 square foot expansion of 2006 has given Rol-Tec a total of 50,000 square feet of working space. The addition was much needed as we have added four new grinding lathes, the new grooving lathe, and a roll polisher in 2007 alone. We are always seeking new ways to serve our customers. We invite you to call Jim McHugh today to see what we can do for you!

## MILWAUKEE AREA CUSTOMERS

In Milwaukee? No problem, so is Tony! Don't forget that the Rol-Tec truck and Tony, our truck driver, are in Milwaukee and the surrounding area every Thursday. We will pick up orders from your plant and deliver our finished product back to you as quickly as possibly.

## COMING NEXT QUARTER

Our newest capability -- Compression and Transfer Molding

Rol-Tec now has the equipment needed to offer compression and transfer molding. These new processes will allow us to manufacture rubber and silicone parts of various shapes and sizes. In the past our extrusion process has limited us only to cylindrical part production. However, with the addition of compression and transfer molding, we are able to do parts of all shapes and intricacies (i.e., heat seal bars, O-rings, cappers, and bumpers).

For more information on this or any other of the items in this newsletter give us a call, arrange for a tour, or look up [www.rol-tec.com](http://www.rol-tec.com).
